Fri., May 21: District Conference

January 19, 2010

Dr. Francis Chan  
Professor of Zoology  
Oregon State University  
Collaborator in PISCO (Partnership for  
Interdisciplinary Studies for Coastal Oceans)

Dr. Francis Chan is responsible for research and monitoring of biogeochemical patterns and processes in the coastal ocean for PISCO.

Dr. Chan's research is centered around the structure and dynamics of biogeochemical processes in the sea. He studies both the processes that give rise to ecosystem properties such as primary productivity and nutrient cycles and the consequences of those properties on ecological communities. His work also involves studies into the linkages between ecosystem dynamics and climate variability in the coastal ocean.

Dr Chan received his B.S. from Hampshire College and his Ph.D. from Cornell University.
